

USA Floor-Tec and Pizza Hut– A Winning Combination

USA Floor-Tec, Inc. is proud of our partnership with Pizza Hut® as the official floor vendor source for all future remodels and newly constructed restaurants across the USA! Efforts are already underway in a number of regional markets to provide diamond polished concrete solutions as a part of the new brand image and store designs for Pizza Hut® restaurants. Our first assignment was in Denton, Texas– a location remodel. As you can see, the results not only enhanced the new store interior design, but will certainly provide greater durability and sustained longevity than the previous traditional ceramic tile solution. Here are just a few of the key benefits of diamond polished concrete:

(sample color- black)

- An Attractive Contemporary Look**
Many restaurants are recognizing the aesthetic qualities of diamond polished concrete.
- Increases Impact of Existing Light**
While achieving a certain ambiance within the interior environment, diamond polishing increases the light up to 30% while reducing energy demands.
- Low Maintenance** Polished concrete is one of the easiest floors to maintain in high traffic zones. A broom and damp mop does the job.
- Coating Free and Abrasion Resistant**
It's a pure permanent flooring solution. The concrete densifying processing formula provides one of the most durable surfaces with no peeling, chipping or flaking over time.
- National Flooring Safety Institute**
Polished concrete meets and exceeds the high traction flooring standards when wet or dry.
- Environmentally Friendly** Polished concrete is the only renewable flooring that can be renewed on a job site. (LEED Benefits)
